

iCV MEFED Database Release Agreement

To advance the state-of-the-art in facial emotion recognition, the iCV MEFED database will be made available to researchers in facial emotion recognition on a case-by-case basis only. All requests for the iCV MEFED database must be submitted via email to (shb@icv.tuit.ut.ee). To receive a copy of the database, the researcher must sign this document and thereby agree to observe the restrictions listed herein. Failure to observe the restrictions in this document will result in access being denied for the balance of the iCV MEFED database and being subject to civil damages in the case of publication of images that have not been approved for release, a violation of restriction 3 below. The database will be available to researchers via Google Drive only. The images are available in ppm format; no other image formats or methods of distribution will be permitted. The researcher(s) agrees to the following restrictions on the database:

1. The database will not be further distributed, published, copied, or further disseminated in any way or form whatsoever, whether for profit or not. This includes further distributing, copying or disseminating to a faculty or organization unit in the requesting university, organization, or company;
2. The images will only appear in technical reports, technical papers, and technical documents reporting on face recognition research. There will be no more than in total 10 images used at a time in a publication.
3. All documents and papers that report on research that uses the iCV MEFED database will acknowledge the use of the iCV MEFED database. Use of the iCV MEFED database will be acknowledged as follows: "Portions of the research in this paper use the iCV MEFED database of facial images collected under the PUT638 project, sponsored by the Estonian Research Council" and citations to:
